Projects

LendingHandCleaners
A website designed for Residential cleaners

A brochure website designed using Figma and developed using Nextjs. Along side of Next this site uses a mix of Styled Components and SCSS. Styling choices include css-grid for a responsive layout, with the assistance of flexbox and custom variables.

Casey Hall Law
A website for a personal Injury Lawyer

This site is fully functioning and is the site he uses today. I was responsible for design, development, copywrite, and SEO. Tools used to develop this site include: NextJs, SCSS, LazyLoad for Images, and Vercel for deployment.

AHBowtique
Ecommerce React Site

This ecommerce site is custom built using React and Redux. Styling features bootstrap and bootswatch for a quick base stying. The site is functional with paypal pay system(set in test mode).

GamerFacts
A video game review website

A video game review site, equipped with full CRUD functionality, and admin functions for those select users. This site was built using the MERN stack and redux. This layout was custom using flexbox/Grid along with vanilla CSS.
